

EZ-Tap

Suite of Products

Distributed By

Simplify your diagnostics and monitoring,
with Ez-TAP Wireless Data Link Adaptor,
by eliminating the need for wires.

Features and Benefits

- Identify all trucks entering and exiting your facility
- Automatically report parameters important to the operation of your company
- Automatically report SAE fault codes
- Automatically report user defined parameters and Triggers Events
- Run OEM Diagnostics Software (RP1210 Compliant)
- Permanent and Temporary installations available
- Integrated TPMS (Tire Pressure Monitoring System)
- Store service records on EZ-Tap
- Installs in seconds with no tools required
- No “IT” knowledge required

Applications

The EZ-Tap has 4 different applications:

1. Wireless diagnostics
2. Temporary installation
3. Permanent installation
4. Law Enforcement

Wireless Diagnostics

- Allows service techs to perform diagnostics, the same way as they have for years, except without any cabling
- Vehicles can be read inside or outside the service bays up to 500 ft from computer
- Able to modify any parameters inside the ECU through OEM software
- Interfaces directly with OEM software

Would you Rather...

OR

Temporary Installation

- Allows for periodic monitoring of all trucks in fleet
- Will capture and report parameters that are important to your operation (idle time, fuel mileage etc.)
- Reports any SAE faults
- Can be switched very easily from one truck to another

Permanent Installation

- The Ez-Vis unit will allow for constant monitoring of trucks as the data will be uploaded into system as the trucks enter the facility
- Identifies all trucks entering and exiting your facility
- Will capture and report parameters that are important to your operation (idle time, fuel mileage etc.)
- Allows to track and alter driver habits, which will increase productivity
- Reports any SAE faults
- Integrated with TPMS
- Stores service records

Law Enforcement

- Allows for instant access to generally broadcasted truck parameters, including speed limiter settings
- Connects and uploads data in seconds
- Read only device
- One unit supports all truck and engine configurations
- Fits quickly onto the J-BUS
- No “IT” knowledge required, user friendly
